

Gen 3 ISP Dish Base Adaptor for Pole Mounts 59MM-SM25

Matchmaster
For the Best

The SM25 is an adaptor for Generation 3 ISP dishes to allow the installation of new and existing roof mounts. The SM25 is designed to be used with Matchmasters 13MM-SM06S, 13MM-SM17 and SM22 mounts or with existing mounts of suitable tube diameter. Unlike other mount adaptors, the SM25 features an adjustable clamping assembly, allowing it to lock the dish securely in place. This prevents the dish from oscillating or shaking on the mount in high winds and transferring noise to the building structure.

Features and Benefits

- » Heavy duty Gen 3 ISP antenna pole mounting adaptor with 44.5mm inside diameter.
- » Designed to be used with SM06S, SM17 and SM22 mounts with 44.5mm outside mast diameter or any other mast of suitable structure.
- » 4 x adjustable locking bolts for a stable and secure connection to the dish base.
- » Made from high-quality galvabond steel with inside or outside mast cable routing options.
- » No modification is required to the ISP dish; SM25 is built to a fixed angle for a simple yet secure installation.
- » Proudly made in Australia
