

Solstice

2000W INFRARED OUTDOOR HEATER WITH REMOTE CONTROL

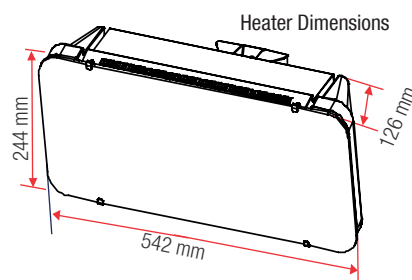

Ventair's Solstice outdoor heater is a sleek and powerful infrared heater tailored for covered patios, balconies, and alfresco areas.

With a premium ceramic glass panel and high-quality halogen heating element, the Solstice produces up to 2000W of radiant warmth instantly.

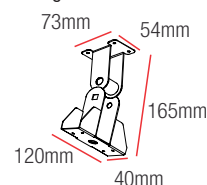

The Solstice can be mounted to either a wall or ceiling, and is a simple AC plug & lead installation. The heat can warm an area from 15m² from a ceiling placement to almost 40m² when wall mounted.

Users can entertain in cosy comfort with the convenience of the remote control, adjusting the three heat settings and auto-off timer from anywhere in range.

With its black powder coated exterior and an IP55 rating, Solstice is a minimal-effort, maximum-reward outdoor heater.

Heater Dimensions
